Technical Skills

- **SQL** (SQL Server Management Studio)
- **Python** (Pandas, seaborn, Matplotlib)
- **Tableau**
- **Excel** (XLookup, Conditional Formatting, Pivot Tables)

Soft Skills

- **Masterful Communicator** (Participated in University Model UN and Group Discussion competition)
- **Team Leadership** (Member of Hostel Cluster Committee and two times Class Representative)
- **Effective Presenter** (Delivered a standout presentation in the University Winter Winning Camp)
- **Story-telling** (Narrated many folklores and historical tales to my foreigner friends in the University)

Projects

COVID-19 TABLAEU PROJECT

- Developed a **Tableau** dashboard visualizing COVID-19 infection and death trends from January 2020 to January 2021.
- Analyzed infection rates and death statistics to highlight the pandemic's regional impact.
- Implemented interactive features for user-driven exploration of data.

AIRBNB TABLAEU PROECT

- Developed a Tableau dashboard analyzing average price by bedroom type and zip code.
- Incorporated an interactive map to visualize pricing trends by area zip-code.
- Visualized price trends throughout the year to identify seasonal patterns.
- Enhanced data storytelling through clear visualizations and insights for potential investors.

SQL PROJECT; CLEANING HOUSING DATA

- Cleaned and standardized housing data using SQL to enhance data quality and usability.
- Implemented various data cleaning techniques, including date format standardization and address population.
- Remove duplicates and deleted unused columns to streamline the dataset for analysis.

EXCEL PROJECT; HOUSING DATA ANALYSIS

- Created an interactive dashboard to visualize key insights from the cleaned housing dataset.
- Developed charts for Profit Percentage per Property Sale, Property to Bedroom Percentage, Average Land Value, and Average Property Value.
- Enabled data-driven decision-making through clear visual representation of housing market trends.
